EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Louis DeJuidice on February 3, 2005.

3. The application has been amended as follows:

A. In claim 6, line 6, after 'filaments' insert therein **—and a binding resin mixed and distributed therein and partially on the surface thereof--**.

B. In claim 6, line 7, please delete **“a binding resin applied to each of said filaments of said wefts,”**.

C. In claim 9, line 6, after 'filaments' insert therein **—and a binding resin mixed and distributed therein and partially on the surface thereof--**.

D. In claim 9, line 7, please delete **“a binding resin applied to each of said filaments of said wefts,”**.

E. In claim 10, line 6, after 'filaments' insert therein **—and a binding resin mixed and distributed therein and partially on the surface thereof--**.

F. In claim 10, line 7, please delete **“a binding resin applied to each of said filaments of said wefts,”**.

Response to Amendment

1. Applicant's amendment filed November 22, 2004, has been entered. Claims 6, 9, and 10 have been amended as requested. The pending claims are 6-10.
2. Said amendment is insufficient to overcome the rejection of claims 6-10 based upon the Port reference (US 4,123,577). Specifically, said amendment limits the binding resin to being applied to each multifilament weft yarn. Since the binding resin of Port is applied to the surface of the woven fabric via a web of melted thermoplastic fibers, said resin is at least partially present on each multifilament weft yarn. However, with the above Examiner's Amendment, the location of the binder resin is clarified (i.e., mixed and distributed within and partially on the surface thereof), thereby distinguishing the present invention from the Port teachings. [Note support for the new claim language is found in the specification at page 13, lines 14-21.] Additionally, one would not be properly motivated to modify the Port invention in the manner claimed by applicant since said modification would destroy the intent of Port (i.e., two fiber types on surface wherein the low melt fiber aids in binding the second dyeable cover fiber to the surface). Thus, the rejections of claims 6-10 as being obvious over the cited Port reference are hereby withdrawn.
3. An updated search of the prior art has produced no new art for which to base a rejection upon. However, the art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. Therefore, claims 6-10 are allowed.
